Profile

I'm a 4th year student at Saxion University of Applied Sciences. Throughout my education at Saxion, I built web applications for external clients which has now become my passion. Although I enjoy working on both frontend and backend development, my main interest is in the creative part of programming where I get to try new ideas and create visually appealing interfaces.

Professional Experience

2023/03 – 2023/08

Software Engineer Intern

Everbridge [↗](#)

- Developed a Single Sign-On (SSO) web application using React, ensuring secure and user-friendly access for employees to internal software.
